

CLAUDIU SCHUSTER

Senior Cloud & Platform Engineer

15+ years across infrastructure, operations, software and automation. I design systems end to end — from first prototype and CI/CD path to secure, observable production operations — combining Kubernetes/OpenShift, hybrid cloud, Infrastructure as Code and pragmatic development. Technical generalist by conviction; open-source builder by passion.

01

EXPERIENCE · RECENT

MAR 2017
— PRESENT

Freelance Cloud, DevOps & Blockchain Engineer

Independent · Remote / Krefeld

- Architecture, development and operations across cloud, DevOps, infrastructure and software — from automation systems to zero-knowledge proofs.
- Build and maintain open-source Linux and Cinnamon tooling under OSS Singularity, with an emphasis on safe operations, recovery and useful interfaces.

JUL 2025
— AUG 2026

Senior Cloud Engineer

Riege Software International GmbH · Meerbusch / hybrid

- Designed, implemented and operated hybrid-cloud infrastructure within an agile operations team, focusing on Kubernetes and Red Hat OpenShift platform engineering.
- Turned MVPs and proofs of concept into initial architecture designs and repeatable delivery paths.
- Improved CI/CD pipelines and implemented Terraform, Ansible and Argo CD practices for automated, GitOps-based operations.
- Strengthened scalability, performance and security; analysed and resolved incidents in close collaboration with development teams.
- Introduced, developed and rolled out shared AI agents and reusable AI skills.

JUL 2023
— JUN 2025

Planned Sabbatical

Krabi, Thailand · Relocation, personal projects and marriage

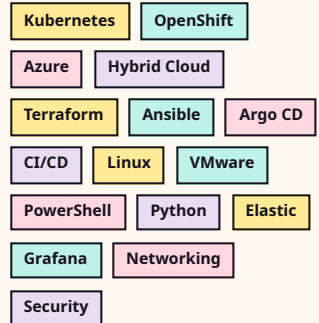

JAN 2022
— JUL 2023

DevOps Engineer

Siemens AG · Nuremberg

- Designed CI/CD, R&D and package-management infrastructure; created reusable pipeline templates for build, container and research workflows.
- Developed PowerShell Core modules and extensive automation; administered and automated enterprise VMware vSphere 6.5–8 with PowerCLI.
- Implemented and operated a central Elastic Stack cluster plus AWX with a custom database inventory plugin; administered Sophos UTM/XG lab firewalls.

CORE STACK

CURRENT CREDENTIALS

Red Hat Certified Specialist in OpenShift Virtualization

EX316 · valid through Dec 2028

Red Hat Certified OpenShift Administrator

EX280 · valid through Nov 2028
Red Hat certification ID: 250-166-386

ENGINEERING SIGNAL

Architecture to operations

Systems that remain understandable, secure and repairable after launch.

Automation with purpose

Repeatable paths from commit to resilient day-two operations.

Human in the loop

Technical depth that builds trust and makes real work easier.

LANGUAGES

German

Native / bilingual proficiency

English

Full professional proficiency

02

EXPERIENCE · FOUNDATIONS

JAN 2020
— DEC 2021

Consultant

ALTEN GmbH / ALTEN SW GmbH · Nuremberg · Assigned to Siemens from Feb 2020

- Developed C# and SQL solutions, DevOps infrastructure, package-management projects, PowerShell automation and reusable CI/CD templates.
- Administered VMware vSphere and Sophos environments; operated Elastic-based automation and monitoring infrastructure and continued a large non-ERP logistics platform for BSH Hausgeräte.

NOV 2019
— DEC 2019

Consultant

CLEAR GROUP · Erlangen · Acquired by ALTEN

Backend development in C# and SQL plus HTML, JavaScript and CSS frontend work for a warehousing, controlling and track-and-trace platform serving MAGNA and BSH Hausgeräte.

MAR 2017
— NOV 2018

Managing Director & IT Systems Engineer

Spreadblock ehf. · Reykjavik, Iceland

- Planned, built and operated a GPU-mining data centre and its specialised operating-system, software and monitoring environment for large fleets of network-booted Linux systems.
- Operated vSphere, global site-to-site and client VPNs, firewalls, blockchain nodes and mining pools across secured on-premises and cloud environments.
- Developed Ethereum dApps and smart contracts using Solidity, Perl, Go, Node.js and frontend technologies.

Parallel role: Solidity Smart Contract Developer, Smart Mining ehf. · Jun–Nov 2018

SEP 2011
— FEB 2017

Technical Consultant

SOFTWERK GmbH · Fürth

- Designed and administered complete infrastructures for SMEs, schools and medical practices; delivered first- through third-level support and specialist projects for enterprise customers.
- Led VMware vSphere and Sophos UTM/XG operations, including the in-house data centre, and implemented monitoring with Nagios, Icinga, Elastic/Kibana and related platforms.

MAR 2008
— AUG 2009

Early Technical Operations

HERBERG. Engineering GmbH / B+S GmbH · Nuremberg / Erlangen

Maintained the automated parcel-distribution system at DHL's DENUUB hub and worked in control-cabinet construction.

TECHNICAL CAPABILITIES

Platform & infrastructure

Kubernetes, OpenShift, Azure, hybrid cloud, VMware vSphere 3.5–8, Veeam, Linux/Unix and Windows Server.

Observability & security

Elastic/ELK, Kibana, Grafana, Nagios, Icinga, Zabbix, Sophos UTM/XG, VPNs, firewalls and network security.

Automation & delivery

Terraform, Ansible/AWX, Argo CD, GitOps, Azure DevOps, CI/CD, PowerShell Core and Bash.

Software & data

Python, C#, SQL, JavaScript/Node.js, Go, Perl, Solidity, APIs, backend/frontend development and AI agents.

EDUCATION

State-Certified Engineer in Information Technology

Fachschule für Techniker der Stadt Erlangen · 2009–2011 · grade 2.64

Electronics Technician — Energy & Building Technology

Vocational training · Erlanger Stadtwerke AG · 2004–2008

SELECTED CERTIFICATIONS

MCSE: Cloud Platform & Infrastructure (Charter)

Microsoft · 2016

MCSE: Server Infrastructure

Microsoft · 2014

MCSA / MCITP portfolio

Windows Server 2008/2012 and Windows 7/8 · 2013–2014

VMware VSP 5 & VTSP 5

VMware · 2013

CCNA Exploration 1–3

Cisco · 2010–2011

AEVO trainer qualification

IHK Nürnberg · 2010

Full certificates and transcripts are available through LinkedIn.

SELECTED OPEN SOURCE

PDrive Control Center ↗

Native Linux experience with resilient transfers, encrypted credentials and understandable recovery.

ChatGPT Usage ↗

Native Cinnamon panel tooling for live limits, reset times and credits.

OSS Singularity ↗

Open-source lab for Linux tools, automation and experiments.
